

WOLF ■■■

**Robust bumper rail in PVC**  
**Excellent visualization of the ticket strips in shelves and chest with.**

**RCB glazing**  
 Front uprights offers better accessibility to the display plate facilitating the work of the operator.

**Service shelf**  
 Made of stainless steel quality AISI 304.

**Top shelf**  
 Constructed in painted aluminum profile.

**Ends**  
 Made of plastic (ABS) injected with polyurethane, resistant to blows and rayons. With tempered silkscreened glass.

**Structure**  
 Cabinet injected in one piece (service shelf, backrest and chest) giving more structural solidity and avoids the possibility of air or humidity transference. The uprights are protected by a superficial

treatment that assures a resistance to the saline fog 720 hours according to normative ASTM B117-95. Base composed by semi-covered cilindrical legs by sheet of prepainted steel. With vertically adjustable skids.

**Control system**

- Mecanical thermometer
- Digital thermostat
- Control master

**Electrical components**  
 Extractable board located in the lowerside part of the chest. Fluorescent tubes with acrylic protection that avoid the loss of goods in case of breakage. Thanks to the use of standardized components (IRAM, IEC, UL) vained wire, and the elimination of joints, WOLF is a safe cabinet for the users.
